E-mail to.olga.ko@gmail.com

I have been designing interfaces for complicated products for over 11 years.

In my work, I rely on user scenarios, research data, analytics, and statistics. I take business goals and the capabilities of the development team into account.

In teamwork, I find it important to reach agreements. I'm fine with criticising and discussing my decisions.

Product Designer, UX/UI Designer

SKB Kontur — ecosystem for business, kontur.ru

November 2011 – to the present

I have worked in three product teams. There are [Kontur.Buhgalteriya](#), [Elba](#), [Diadoc](#)

Responsibilities

- I design interfaces based on user scenarios, analytics, statistics, and metrics
- I work with complicated scenarios and pay attention to details
- I understand what can be sacrificed in an interface when development resources are limited
- Together with the UX researcher, I: formulate hypotheses, create usability testing scenarios, prepare interactive prototypes, participate in user interviews, draw conclusions based on research
- I write clear interface texts
- I propose improvements to existing solutions in the service. I openly point out critical issues, warn about potential future problems, and influence development plans.
- I explain and defend my ideas. I ask questions to better understand the other person. I recognize the importance of team communication and trust in design decisions
- I systematize and organize everything in my work. I ensure that prototypes are convenient not only for designers but also for the development team. If I see problems, I propose solutions
- I suggest improvements to development processes when I notice problems
- I mentor designers by sharing my experience and helping them grow
- I assist in hiring designers by reviewing resumes, evaluating portfolios, and conducting interviews

Achievements

- Designed an onboarding for new users of Elba: it won the third place in the nomination "Interface" in the annual competition among designers of SKB Kontur "Kontur Design Award". This onboarding is in the portfolio: <https://olga-ko.com/portfolio-ru/onboarding-elba/>
- Made a checklist for product designers: <https://olga-ko.com/img/portfolio/checklist.png>
Designers no longer forget important steps in solving tasks
- Attended Maxim Ilyakhov's three-day course "Information Style and Text Editing" in October 2013: <https://bureau.ru/courses/certificate/7bb0f46402e57408fb6da8f3d7a9bcae1425385/40/> Following the course, my interface texts became much clearer, and their meaning was conveyed more quickly and easily
- Completed a course on data visualization "Flexible Chart": <https://stepik.org/cert/2810442?lang=en>
- Mentored a product design course for students. Several students are working in Kontur now
- Created a [Big Library](#) of professional books in SKB Kontur and organised its work. Now there are about 1400 books in the library and about 2000 readers from Kontur's offices in Yekaterinburg. I have assembled a group of librarians and set up processes. The library got several internal awards in Kontur: 1st place in the Kontur Design Award, the quarterly nomination "Approved by Kontur"

Lead Product Designer, UX/UI Designer

SKB Kontur, kontur.ru

April 2018 – March 2020

Right now I am not considering a job as a Lead Product Designer.

Responsibilities

- Managing a design group of 9 product designers
- Hiring new designers, fulfilling performance reviews, designer development, process management in product teams, maintaining communication between designers of different projects

Together with other design leads

- Created a grading system to evaluate designers
- Created Kontur Guides: <https://guides.kontur.ru/>

Achievements

- Wrote Form Validation guide: <https://guides.kontur.ru/principles/forms/validation/>
- Wrote a series of notes for the new Kontur designers: <http://design-notes.help>
The notes were awarded 2nd place in the nomination "Design-activity" in the annual competition among designers "Kontur Design Award"
